

DW-22B User guide.

DW-22B App UI. -

Title area - User can set a persistent Title for the App. ie. Sparky's Cafe.

Meters - 4 audio meters, 2 for input channels, 2 for output channels

Input/Output Controls -

- When "Quick Controls" is selected (settings) there will be buttons that allow change between Input vs Output as well as Slider vs Stepper controls. Otherwise these buttons are hidden.
- 2 Volume controls. Can be either sliders or steppers. Can be used on either inputs or outputs.
- 2 Mute controls. Can be used to Mute either inputs or outputs.
- Input/Output Group Controls - Group controls for Volume and Mute that group (gang) both channels so they operate as one. One for Volume, one for Mute.

Network Controls -

- Text input fields for PORT and IP Number.
- Press On - Socket connection to IP Number is established.
- Press Off - Socket is closed.

Info: - area for helpful info like "Press On to Connect" ...

DW-22B App Settings -

Controls group -

- Meter Poll Rate - rate at which the meters are updated.
- IP / Title Lock - will lock these text fields so they cannot be changed from within the App.
- Default Control Mode - selects between Inputs or Outputs.
- Default Control Type - selects between gain sliders or gain steppers.
- Quick Controls - these controls allow instant change of input vs output and slider vs stepper.
- Slider Mode - select if slider updates are continuous or occur only at end point.

Input Setup group -

- Chassis Slot - select the slot in the chassis that is being used for inputs. There are 8 slots in a chassis, any one might be used for inputs.
- Meter 1 / Volume 1 - select the channel for Meter 1 and Volume Control 1
- Meter 2 / Volume 2 - select the channel for Meter 2 and Volume Control 2
- Volume Min - select Input Minimum volume level from -60dB to +12 dB
- Volume Max - select Input Maximum volume level from -60dB to +12 dB
- Output Setup group - Same as Input Setup Group
